

HAMZA SAJID JADOON

Mobile & Web App Developer
React Native | React | MernStack

Address: Falcon Complex, Rawalpindi, Pakistan

Phone: +923219595380

Email: hamzasajidjadoon1997@gmail.com

SUMMARY

Accomplished mobile app developer with nearly 3 years of experience in React Native, specializing in creating superior cross-platform applications including web2 and web3. Skilled in React, I've extended my expertise to include the MERN stack, enhancing my capabilities in both frontend and backend development. My technical progression allows me to deliver comprehensive full-stack solutions that integrate seamless functionality with engaging aesthetics. Dedicated to turning innovative ideas into elegantly designed, high performance applications and websites.

SKILLS

Frontend Development

React Native: Proficient in developing cross-platform mobile applications, ensuring high performance and a seamless user experience on both iOS and Android devices.

React: Strong expertise in React for building reusable UI components and managing application state efficiently.

State Management

Redux: Experienced in using Redux for state management in complex applications, enabling predictable state changes and efficient data handling.

Backend Development

Node.js: Skilled in using Node.js for backend development, creating scalable server-side applications and RESTful APIs.

Express: Proficient in using Express.js to build robust and efficient web servers and APIs.

Databases

Firebase: Skilled in using Firebase for backend services, including real-time databases, authentication, and cloud storage.

MongoDB: Experienced in using MongoDB for creating and managing NoSQL databases, ensuring flexible and scalable data storage.

PostgreSQL: Proficient in using PostgreSQL for relational database management, ensuring data integrity and efficient querying.

APIs & Integration

API Development: Adept at designing and implementing APIs, ensuring smooth data exchange and integration with external services.

RESTful APIs: Proficient in building RESTful APIs to enable efficient communication between the client and server.

IDE & Platforms

GitHub , Android Studio , Xcode and Visual Studio Code.

Design Tools

Photoshop and Figma.

Languages

JavaScript , TypeScript , Html and Css.

Soft Skills

Leadership , Problem-solving , Adaptability, Communication and Teamwork.

EXPERIENCE

Senior React Native Developer Catchy Apps <ul style="list-style-type: none">Collaborated remotely with a team based in Germany, assisting in the development of their projects and products. Developed and maintained React Native applications tailored to their needs.	June 2024 - Present
Lead React Native Developer & React.js Collaborator Octaloop Technologies <ul style="list-style-type: none">Initially joined as a React Native Developer and was later promoted to Lead React Native Developer. Led the development and deployment of mobile applications.Collaborated with React web development team, providing support in creating web applications, ensuring consistency and synergy across platforms.	June 2022 - Feb2024
React Native Developer Octaloop Technologies <ul style="list-style-type: none">Developed and optimized React Native applications, enhancing UI design and functionality, leading to improved user satisfaction and increased app usage.Collaborated with senior developers on architectural decisions and feature integration, ensuring robust performance and scalability under peak traffic conditions.	Feb 2022 - May 2022

EDUCATION

Bachelor of Science in Computer Science Iqra University Islamabad <ul style="list-style-type: none">- Bachelor of Science in Computer Science degree holder from IUI, equipped with solid theoretical foundation and practical skills in computer science principles.	Sep 2017 - Sep 2021
--	----------------------------

LATEST PROJECTS

- Drive Streak:** Developed an NFT-based mobile application integrating Google Maps and Web3 technologies, enabling users to earn tokens by covering specific distances.
- Scorpion Yacht :** Developed an application for yacht booking in Miami, utilizing Firebase for management to streamline user reservations and data handling.
- Nexgen:** Nexgen AI Engineered an AI-powered mobile keyboard application using React Native and native modules, enhancing typing efficiency and predictive text accuracy.
- Supervet:** Developed a comic app that provides detailed character information for players of the "Supervet" game, enhancing user engagement and game understanding.
